VERTEX INSTITUTE SOLAN

A Project Report

"Car Purchase and booking Portal"

By

Mr. Aayush Kumar

Reg. No: 1750691

SUBMITTED TO
VERTEX INSTITUTE, SOLAN

In partial fulfillment of the requirements for the award of the

'O'-Level

Session: 2024-2025

Vertex Institute, Solan
(An Accredited Institute of NIELIT)
Near Govt. Degree College Rajgarh Road Solan HP-173212

ACKNOWLEDGEMENT

I would like to express my sincere gratitude to all those who have supported and guided me throughout the completion of my project.

First and foremost, I would like to thank my teacher **Ms. Vibhuti Negi** for their valuable guidance, continuous encouragement, and constructive suggestions, which helped me in successfully completing this project.

I am also thankful to my institution for providing me with the necessary resources and environment to learn and work on this project effectively.

I would like to extend my appreciation to my friends and classmates who supported me with their ideas and feedback during the development of this project.

Lastly, I would like to thank my family for their constant support, motivation, and understanding throughout this journey.

This project has been a great learning experience for me, and I am grateful to everyone who contributed directly or indirectly to its completion.

Aayush Kumar
Course: O-Level
Academic Session: 2024–2024

CERTIFICATE OF ORIGINALITY

This is to certify that the project report entitled "**Car Purchase and booking Portal**", submitted by **Mr. Aayush Kumar** (Reg. No: 1750691), is a record of his original work carried out under my guidance at **Vertex Institute, Solan**, an accredited institute of NIELIT. To the best of my knowledge, this project report has not been submitted, in part or full, for the award of any degree, diploma, or certificate in any other institution.

Summary of the Project 107

Bibliography / Resources 108

Introduction of the Project

The **Car Purchase and Booking Portal** is a web-based application designed to provide users with a simple and efficient way to explore and book vehicles online. It offers a clean and user-friendly interface where users can browse car models, view details, and access booking options.

The project focuses on smooth navigation, modern design, and interactive features to enhance user experience. It is developed using web technologies and follows responsive design principles to ensure proper functionality across different devices.

Overall, the portal presents a practical solution for an online car booking system with an emphasis on usability and design

Objective of the Project

The main objective of the Car Purchase and Booking Portal is to develop a user-friendly and efficient web-based platform that allows customers to explore, select, and book cars online with ease. The system aims to simplify the car purchasing process by providing detailed information about available vehicles, including specifications, pricing, and features.

This project is designed to enhance user experience by offering an intuitive interface, smooth navigation, and responsive design using HTML, CSS, and JavaScript. It also focuses on reducing the time and effort required for traditional car purchasing by enabling users to compare different models and make informed decisions from the comfort of their homes.

Additionally, the portal aims to provide a structured booking system that ensures accuracy, transparency, and convenience in managing customer requests. Overall, the project demonstrates the practical implementation of front-end web development technologies to create a real-world application.

Tools/Platform, Hardware and Software Requirement specifications

Languages / Platform Used

The development of the **Car Purchase and Booking Portal** is carried out using the following tools and platforms:

- **HTML (Hypertext Markup Language):** Used to design the structure of web pages.
- **CSS (Cascading Style Sheets):** Used for styling and layout of the website.
- **JavaScript:** Used to add interactivity and dynamic behaviour to the web pages.
- **Code Editor (e.g., Visual Studio Code):** Used for writing and managing the code.
- **Web Browser (e.g., Google Chrome):** Used for testing and running the application.

Hardware Requirements

The system requires basic hardware components for development and execution:

- **Processor:** Intel Core i3 or higher
- **RAM:** Minimum 4 GB (8 GB recommended)
- **Storage:** At least 500 MB free disk space
- **Display:** Standard monitor with internet browsing capability
- **Input Devices:** Keyboard and Mouse

Software Requirements

The following software is required to develop and run the project:

- **Operating System:** Windows, macOS, or Linux
- **Web Browser:** Google Chrome, Mozilla Firefox, or Microsoft Edge
- **Code Editor:** Visual Studio Code / Sublime Text / Notepad++
- **Technologies Used:** HTML5, CSS3, JavaScript (ES6)

System Development Life Cycle (SDLC)

The development of the **Car Purchase and Booking Portal** was carried out using a structured approach to ensure clarity, efficiency, and quality throughout the project. The System Development Life Cycle (SDLC) helped in organizing the development process into clear and manageable phases, making the system more reliable and user-friendly.

The project started with the **planning phase**, where the idea of creating an online car purchase and booking system was finalized. The objectives, scope, and overall direction of the project were clearly defined.

In the **requirement analysis phase**, the needs of the users were identified. This included features such as viewing car details, comparing models, and booking vehicles online. The focus was on creating a system that is simple, responsive, and easy to use.

The **design phase** focused on structuring the website and designing an intuitive user interface. Proper attention was given to layout, navigation, and visual elements to ensure a smooth user experience.

During the **implementation phase**, the portal was developed using HTML, CSS, and JavaScript. All the planned features were integrated to create a functional and interactive web application.

The **testing phase** involved checking the system for errors, bugs, and performance issues. The website was tested across different browsers to ensure compatibility and smooth operation.

After successful testing, the system moved to the **deployment phase**, where it was made ready for use and demonstration. Finally, the **maintenance phase** ensures that the system can be improved over time by fixing issues, updating features, and enhancing performance based on user needs.

Summary of the Project

The Car Purchase and Booking Portal is a modern web-based application designed to streamline the process of exploring, selecting, and booking vehicles online. The platform provides users with a visually engaging and intuitive interface to browse various car models, view detailed specifications, and access pricing and promotional offers.

Key features of the portal include interactive vehicle listings, categorized browsing (such as SUVs and sedans), and clear action options like “Order Now,” “Learn More,” and “Schedule a Test Drive.” The system is designed with a strong focus on user experience, ensuring smooth navigation, fast performance, and accessibility across multiple devices through responsive design.

Additionally, the platform supports essential booking functionalities, allowing users to make inquiries, schedule test drives, and interact with support features like “Ask a Question.” The project highlights the implementation of modern UI/UX principles and demonstrates the ability to build a functional, user-centric automotive e-commerce solution.

Overall, this project reflects strong front-end development skills, attention to design detail, and the capability to create a practical and scalable vehicle booking platform.

Bibliography / Resources

Languages Used

- **HTML5** – Used to create the basic structure of the website.
- **CSS3** – Used for styling, layout design, and responsiveness.
- **JavaScript** – Used to add interactivity and dynamic behaviour to the website.

Development Tools

- **Visual Studio Code** – Used as the main code editor for writing and managing the project.
- **GitHub** – Used for storing, managing, and version controlling the project code.

Design Resources

- **Font Awesome** – Used for adding icons and improving the visual appearance of the interface.
- **SVG** (Scalable Vector Graphics) – Used for high-quality and scalable graphics.
- **Colour Palette Used:**
  - #f0f0f0
  - #171a0b
  - #5c5e62
  - #3e6ae1

Testing & Support

- **Google Chrome** – Used for testing, debugging, and performance optimization.
- **Various online tutorials and documentation** – Used for learning concepts and solving development-related problems.

This section lists all the tools, technologies, and resources used during the development of the project.
